EXPERIENCE

Stanford Center for Biomedical Informatics Research — November 2024 - Present
Gevaert Lab Student Researcher — *California*

· Developed physics-based neural networks for anatomically accurate image augmentations (tissue compression, stages in respiratory/cardiac phases, etc), significantly improving cancer model accuracy.
· Implemented computer vision models (CNNs, Vision Transformers) for precise breast region segmentation.
· Designed Python data processing pipelines for efficient handling of large-scale biomedical datasets on multi-node systems.

FRC Team 604: Quixilver Robotics — June 2022 - Present
Controls/Software Lead (10) — *California*

· Implemented real-time computer vision systems for autonomous robot navigation and object detection.
· Designed stratgic robotic mechanisms and integrated multi-modal sensors for optimal robot performance and reliability.
· Developed competition data collection infrastructure and visualization tools analyzing 1000+ competition matches with 200+ users.
· Achieved top 0.1% international ranking (12/10,000+ teams) through integrated hardware-software optimization.

UCLA COSMOS (Neurobiology and AI Cohort) — July 2024 - August 2024
Student Researcher — *California*

· Developed neural networks to model rat hippocampus activity, perform image geolocation, and recognized handwritten characters.
· Applied neurobiological priors to computational modeling techniques using Jax, Torch, and TensorFlow.

Pavyl — January 2025 - Present
Software Design Advisor — *California*

· Evaluated memory and computational efficiency of infinite context large language models.
· Recommended app optimizations for model accuracy, external tool integration, and response time.

PROJECTS

StereoSampleGAN - *Independent Research Project*

· Developed pioneering generative adversarial network addressing critical research gaps in high-quality stereo audio synthesis.
· Implemented efficient image-like audio representations and efficient model training techniques.
· Achieved 85% quality improvement and 25x training time reduction compared to industry benchmarks
· Skills: Time-Series Data, Multimodality, PyTorch, NumPy, DSP

Vox Transformis - *Science Fair Research Project*

· Developed LLM-based multimodal musical translation system preserving rhythmic, melodic, and artistic features of sung audio.
· Won Honorable Mention Award out of 977 participants at 2025 Santa Clara Synopsys Science Fair.
· Project presented to San Jose Mayor Matt Mahan and recognizd by the City of San Jose for impact on local language preservation.
· Skills: Model Ensembling, LLM Manipulation, Signal Processing, Model Context Protocol

SporeStrike - *Entrepreneurship Project*

· Designed computational models for drone-based fungal infection treatment system, created prototype 3D printed components.
· Presented project to civil and aerospace engineering pannel; won first place/260 competitors at 2024 FlexFactor Entrepreneurship Championships.
· Skills: Real-World System Design, CAD, 3D Printing

EDUCATION

Leland High School — *4.00 UW A-G*
Junior (Expected Graduation 2026) — *San Jose, CA*

SKILLS

Technical Fields   AI/ML, Data Visualization and Analysis, Robotics, Signal Processing, 3D Printing, Web Development

HONORS & AWARDS

- 2025 Synopsys Science Fair Honorable Mention (Top 10%, 975+ Participants) — 2024
- WCP CADathon/Robot Design Challenge Finalist (Top 1%, 1000+ participants) — 2024
- FRC604: World Championship Milstein Division Winner (12/3500 Internationally, 4/300 in CA) — 2024
- OneHacks III Hackathon: Third Place (3/120 Internationally) — 2023
